**DECISION ON ISSUING A LICENCE FOR APPLICATION DIR 065/2006**

The Gene Technology Regulator (the Regulator) has made a decision to issue a licence in respect of application DIR 065/2006 from Deltapine Australia Pty Ltd. The applicant has received approval for the limited and controlled release of up to 11 GM cotton lines that provide specific resistance to the major caterpillar pests of cotton. The release may take place over a maximum total area of 1.5 hectares on one site in the shire of Narrabri (NSW) during the summer growing season of 2006/07.

The decision to issue the licence was made after extensive consultation on the Risk Assessment and Risk Management Plan (RARMP) with the public, State and Territory governments, Australian Government agencies, the Minister for the Environment and Heritage, the Gene Technology Technical Advisory Committee and the relevant local council, as required by the *Gene Technology Act 2000*.

Issues relating to the health and safety of people and the protection of the environment raised during the consultation process on this application were considered in finalising the RARMP and in making the decision to issue the licence.

The Executive Summary, Technical Summary, the complete finalised RARMP, together with the licence conditions and a set of Questions and Answers on this decision can be obtained on-line from the Office of the Gene Technology Regulator's website or requested via the contacts detailed below.
