DIR123 Refresher training - DIR123 Licence

Field Induction Training Record

RECORD OF TRAINING

DIR123 – Limited and Controlled Release of Canola Genetically Modified for Altered Oil Content

Please keep a copy in your personal files

I, the undersigned, declare that I have received the Nuseed Licence Induction Training in the operational procedures for research conducted under **DIR123** and all relevant information regarding biosafety measures as specified in the *Gene Technology Act 2000* and the *Gene Technology Regulations 2001* and are aware of all corresponding requirements imposed for the conduct of this research.

I acknowledge that I have **received**, **read** and **understood** the conditions **DIR123** and I agree to be **bound** by these conditions and those of the *Gene Technology Act 2000* and the *Gene Technology Regulations 2001* and comply with all requirements of the legislation regulating the conduct of research involving genetic manipulation.

This record of training also acknowledges that my 'Personal Information', as defined by the Act, may be provided to the Régulator through this record.

47(1)(a)

Findings of the monitoring inspection of the [REDACTED] harvester: DIR-123

I write in relation to the findings of the monitoring inspection conducted at Nuseed machinery shed, 5 Ballinger Street, Horsham by monitoring inspectors Andrew Berry, Appaji Srungaram and Andrew Short on 19 April 2016.

This inspection was undertaken following a self-reported incident to the OGTR by Nuseed Pty Ltd on 8 April 2016, in relation to GM seed found in Nuseed's GMO dedicated [REDACTED] harvester that has been previously used on various DIR-123 trial sites.

47(1)(a)

The findings of this inspection have now been finalised and, after discussions I had with the inspectors involved with this inspection, the evidential material collected by them during the inspection, the interviews conducted by inspectors with you and your colleagues, I am satisfied that the seed and non-viable plant material found in the harvester was a one-off incident. Consequently, after analysing all the information that was made available to me, I have found Nuseed Pty Ltd as compliant in relation to licence condition 40A of licence DIR-123.

Further, I wish to inform you that Nuseed's newly developed mechanical harvest protocol as described in the document Nuseed DIR123 – Seed spillage in non PC2 area FINAL REPORT (sent to OGTR on 26 May 2016) looks promising as was evident by the cleaning of the harvester after the harvest of site 15 at Colac.

Following the assurance you have provided in the same document that Nuseed is now confident to remain compliant with reference to licence condition 40A, I wish to make a mandatory recommendation that Nuseed continue to employ this new cleaning protocol whilst cleaning the harvester, each time it is put to use on a GMO trial site. As demonstrated at site 15, the harvester clean down must be undertaken on the trial site where the harvester is used.

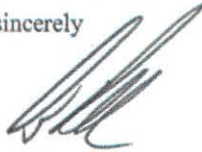

Please be advised that any deviation to this cleaning protocol and/or should Nuseed find any further presence of seed within the harvester in the future, must be reported to the OGTR as soon as practicable.

I wish to place on record my sincere thanks to you and your colleagues [REDACTED] and [REDACTED] for your time and, for your continued cooperation with the OGTR regulatory scheme.

Thank you for the report. We'll be in touch over the next few days. We may want to arrange monitoring at Horsham on the week of the 18th, so will get back to you.

If you have any questions, please don't hesitate to contact me or the monitoring inbox.

Regards

Andrew

Subject: RE: DIR-123 harvester issues [SEC=UNCLASSIFIED]

██████████ 47F

Further to our two telephone conversations, the latest an hour and half ago this afternoon, I wish to confirm that the harvester currently lodged in the machine shed is all good to be released and used again to harvest DIR-123 Site 15, provided your mechanic and the Nuseed staff are happy that the dismantling and re-assembling process is completed to your satisfaction.

47E

Hope this helps.

Best regards

Appaji Srungaram

Thank you for the update on the harvest details. Much appreciated.

Once the final harvest of the remaining bulk and the tents is completed, please let us know as per the reporting time frames mentioned in the licence.

After harvest, please share with us the details of the cleaning of the harvester on site as per our agreed arrangements and [REDACTED] proposed way of going forward (last communication she had with OGTR), such as:
