Dear Dr Bhula,

**Annual Report for DIR 108, for the year 2 December 2016
to 1 December 2017**

I refer to the requirements of the above licence (*viz.* general conditions 16 to 19), to provide the OGTR with an annual report within 90 days of the anniversary of the issue date of this licence.

During the period 2 December 2016 to 1 December 2017, no intentional commercial activities were undertaken with InVigor[®] Hybrid x Roundup Ready[®] canola in Australia. During this period a total of 1.12 ha of research and innovation summer trial sites were planted in Victoria.

During this reporting period, no adverse effects of the hybrid and herbicide tolerant canola were observed at any of the DIR108 trial sites. Furthermore, no unexpected adverse effects were reported to us as a result of dealings licensed by DIR108.

Yours sincerely,
Bayer CropScience
